

BRIGHT LIGHT PLANTS

Plants that do well in a bright light environment are likely to be categorized as, "part/full sun," "direct sun," or "south exposure."

Keep in mind that not all full-sun plants are heat-tolerant, so if your vivarium requires high temperatures, choose your plants carefully!

Low Moisture Required

- Elephant feed
- Spineless opuntia cactus (prickly pear)
- Sempervivum
- Aloe
- Gasteraloe
- Tiger's jaw
- Echeveria

Moderate Moisture Required

- Croton

High Moisture Required

- Gardenia
- Pitcher plant
- Bromelia neoreglia
